Ambrotyping.

L. A. GREEN has just returned to his Daguer wean Rooms, on Church Street, and is prepared to take AMBROTYPES, or pictures on glass - a new feature in the Daguerrean art - in the most approwed style. They are taken in a moment of time clear or cloudy, early or late. The impression is imperishable, not affected by water, light, or the ouch. They are far superior to Daguerreotypes. Call and see them. I will remain in telen some two or three weeks longer, and if any one wishes to earn the new art, I can learn them much quicker than Daguerrootyping. May 15 12 af

The statistical tables of mortality show a reduction in this country of the proportion of deaths from pulmonary diseases. Doct. Ayer attributes this result to the effect of his Cherry Pectoral. He also asserts that the cures from his Cathartic Pills give reason to believe they will, as they come into more general use, materially reduce the mortality from Those particular discuses for which they are designed. From what we know of his preparations, we think he has grounds for his claims, and if he has, it is an attainment of which an Emperor might be know that his skill is bestowing health and life to the masses of his fellow men.

Testimony of Doct. O. Butcher.

Green Bank, Pocahontas Co., April 10, 1855. Gentlemen: Some few months since a patient applied to me for medical advice, afflicted with a evere form of secondary syphilis (he had been under the charge of two physicians without deriving relief.) I commenced using the regular remedica of the profession, but the disease stubbornly resisted all my efforts. The reputation of Carter's Span ish Majure having reached me, and being personally acquainted with yourselves, I determined to give it a trial. I did so, and in a short time its good effects were evident, and three bottles cured him.

As an act of justice to suffering humanity, I cannot withhold my testimony to its virtues as an alterative and prompt purifier of the blood, and take pleasure in recommending it to the profession and the public generally. Yours respectfully,
